The EVO shared project/video storage server is the solution to a better post-production workflow.

The EVO is a powerful & smooth SNS system!

Incredible Workflow Tools:

Integrated with Your NLEs

Complete your projects faster with powerful integrations for all major NLEs. Whether you use Adobe, Final Cut, Avid, or Resolve, EVO has unique features to enhance your workflow.

Unlimited ShareBrowser MAM

Search, tag, comment, and preview files from any workstation across your EVO storage, other network servers, and even cloud storage.

Access EVO from Anywhere

SNS Cloud VPN is an optional virtual private network built exclusively for EVO. It can be set up in less than an hour and provides your remote collaborators with secure and convenient access to your videos and workflow tools.

Cloud Integrated Workflows

Seamless integration with cloud storage solutions like Amazon S3, Dropbox, Microsoft Azure, and more for archive, backup, and remote/hybrid workflows.

The EVO also Includes

Automatically sync, copy, and backup your videos to other storage systems or cloud services using one-time or recurring automation jobs.

Why is the EVO right for media/content creators?

Check out this short video to see why the EVO is the solution for editors, blockchain developers, colorists, and creative teams who needs a shared network storage workflow system to meet their goals.
